

Verification *TinyFEM*

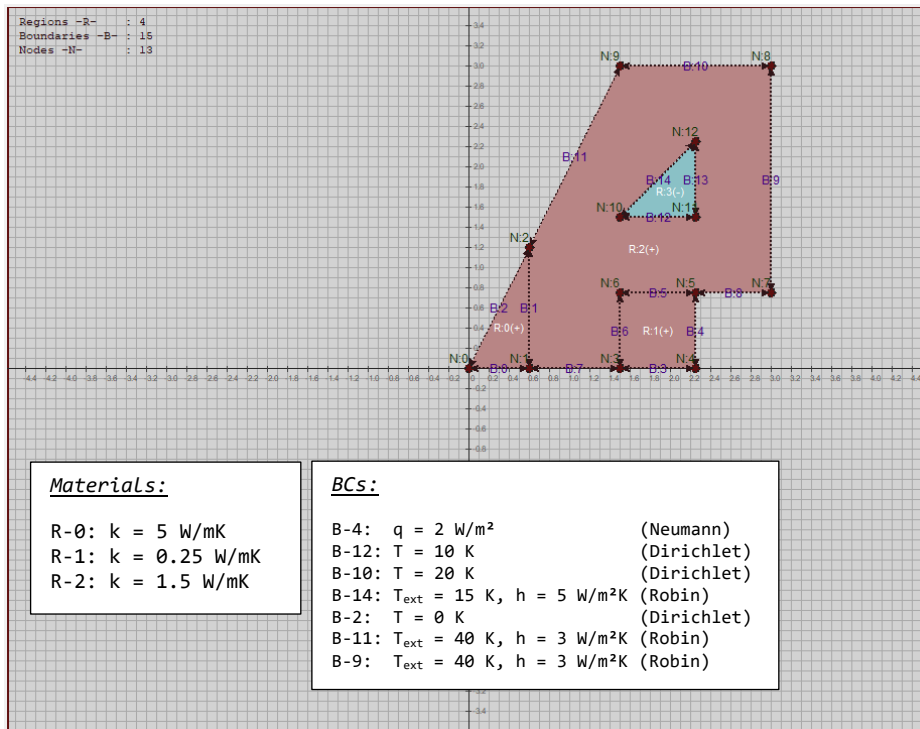

Version: 1.0.0

Authors: Elias Perras, Marius Mellmann

Verification with Professional FEM framework.

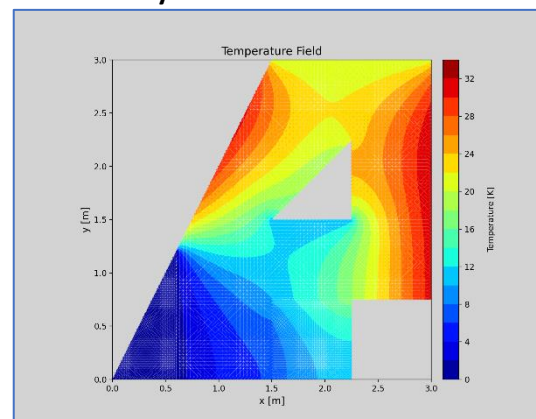

Heat Equation

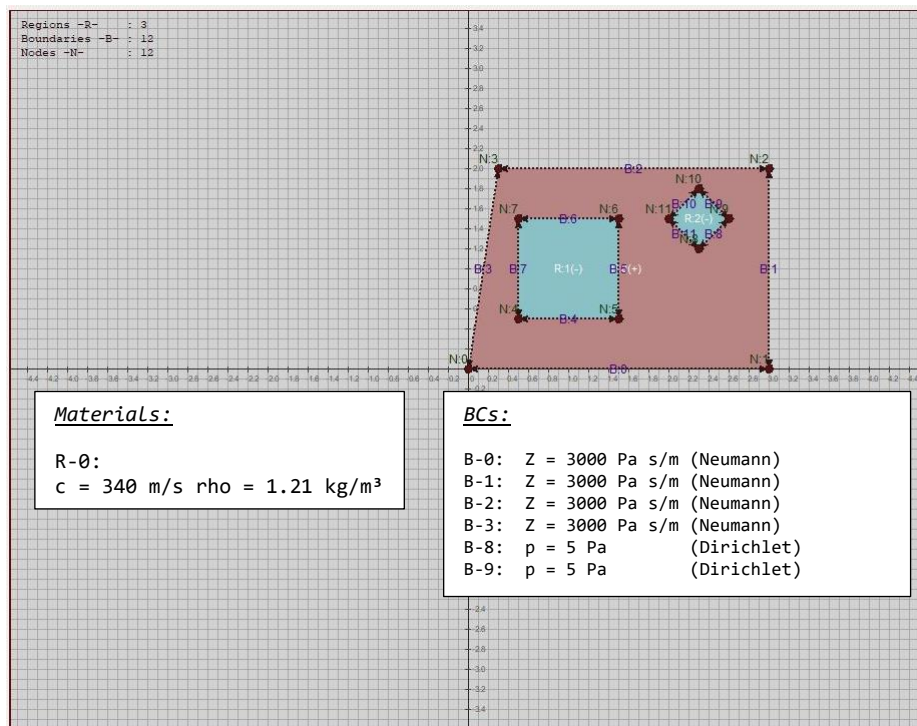

Solution Reference

Solution TinyFEM

Helmholtz Equation

Solution Reference

100 Hz

Solution TinyFEM

Regions -R- : 1
 Boundaries -B- : 15
 Nodes -N- : 16

Materials:

R-0:
 $c = 340 \text{ m/s}$ $\rho = 1.21 \text{ kg/m}^3$

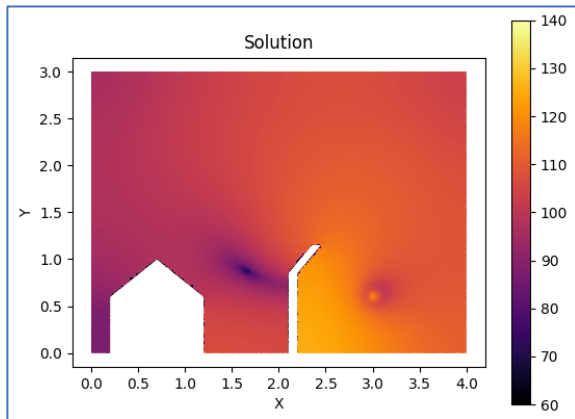

BCs:

B-0: $Z = 411.2 \text{ Pa s/m}$ (Neumann)
 B-1: $Z = 411.2 \text{ Pa s/m}$ (Neumann)
 B-2: $Z = 411.2 \text{ Pa s/m}$ (Neumann)
 N-0: $P = 1 \text{ W/m}$ (Sound Source)

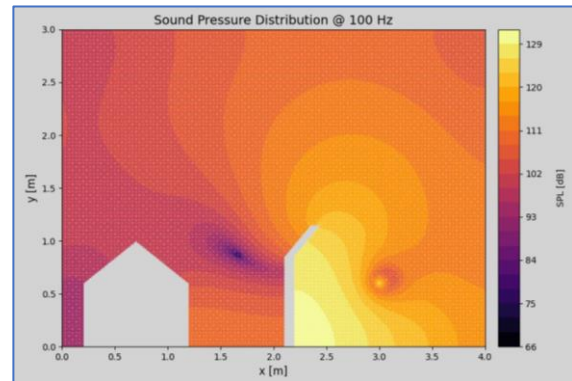

Note: $c \times \rho = 411.2 \rightarrow$ approximation for
 absorbing boundary condition

Solution Reference

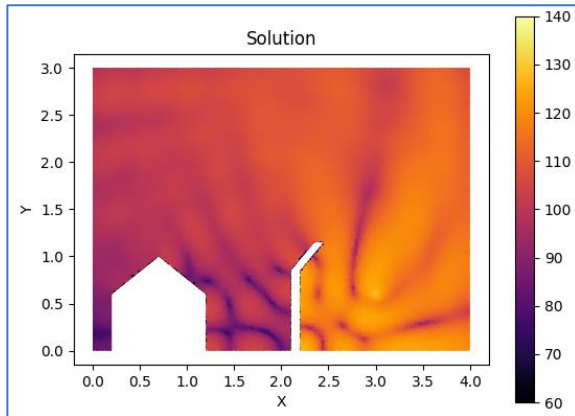

100 Hz

Solution TinyFEM
